and gas industry

- Autocontrol Technologies was established in 1994 by its managing director, Roberto Scatizzi, in order to offer fresh solutions in the on-line instrumentation, process measurements and control automation fields, assisting the customer from design to installation with complete turn-key services.

The company's core business is engineering, construction and installation of high technology process instruments for the oil, petrochemical, chemical and power industries.

The company is ISO 9001:2008 certified and ATEX notified for applications in hazardous areas.

Autocontrol Technologies is organized in three main divisions.

- *La società è stata fondata nel 1994 dal suo direttore Roberto Scatizzi per offrire le più moderne soluzioni specialistiche nel settore della strumentazione on line per la misura ed il controllo di processo, assistendo il cliente dalla progettazione al montaggio, con servizi completi "chiavi in mano".*

Le attività della società sono la progettazione, la costruzione e l'installazione di package di strumentazione ad alto valore tecnologico per l'industria petrolifera, petrolchimica, chimica ed energetica in generale. L'azienda è certificata ISO 9001:2008 e notificata ATEX per le applicazioni in aree con pericolo di esplosione. Autocontrol Technologies è organizzata in tre principali divisioni.

Automatic sampling

● AUTOMATIC SAMPLING

The company is an international leader in designing and manufacturing automatic sampling systems for crude oil and refined products.

Automatic Sampling is an increasingly worthy activity when oil custody transfer takes place.

The rising costs of raw materials, processing and disposal of pollutants have made a representative sample strategic because it represents the entire batch of oil in transit.

Years of experience in the field and unparalleled professionalism guarantee immediate returns on investments, as sampling becomes a means for cutting costs significantly over time.

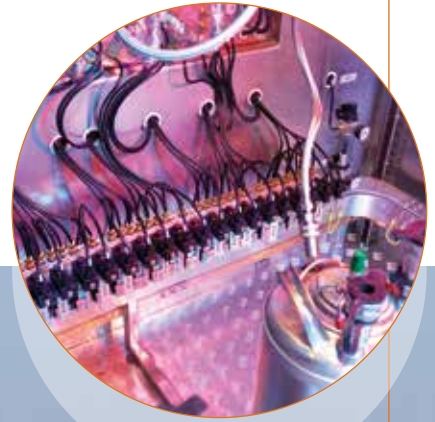

Today, Autocontrol Technologies has supplied its customers with automatic sampling units throughout the world in oil terminals, production wells, off-shore platforms, tankers, refineries and metering skids. The company is also a permanent member of the main international organisations (ISO, API) that regulate this strategic matter.

○ CAMPIONAMENTO AUTOMATICO

La società, con la progettazione e produzione di campionatori, è leader riconosciuta internazionalmente nel settore del campionamento automatico degli olii greggi e dei prodotti raffinati. Il campionamento è un'attività che sta assumendo sempre più importanza nel momento del 'trasferimento di proprietà' del bene "petrolio".

I costi sempre in aumento della materia prima, quelli di lavorazione e di smaltimento degli inquinanti, rendono strategica l'attività di raccolta di un campione che rappresenti l'intero lotto di materiale in transito. La lunga esperienza nel settore e l'elevata professionalità garantiscono un rapido recupero dell'investimento, poiché l'attività di campionamento diventa una fonte di riduzione dei costi che permane nel tempo. A tutt'oggi, Autocontrol Technologies ha fornito ai suoi clienti campionatori automatici utilizzati in tutto il mondo presso terminali marittimi, pozzi di produzione, raffinerie, piattaforme petrolifere, petroliere e skid di misura fiscale. L'azienda è inoltre membro permanente dei principali comitati internazionali (ISO, API) che regolano questa materia strategica.

Heating, ventilation & air conditioning units

● HEATING, VENTILATION & AIR CONDITIONING UNITS (HVAC)

The company is an active manufacturer of Heating, Ventilation & Air Conditioning units (HVAC) for installation in hazardous areas (refineries, oil wells, off-shore platforms, etc.) dealing effectively with the most severe environmental conditions.

More than ten years' experience in the field of system integration with the production of process analyzer shelters, has allowed us to create high quality and top performing HVAC units.

Our wide range of HVAC systems allows us to meet the demands and needs of our customers.

ATEX certification of these systems makes our company a landmark for end users, top engineering companies and main contractors.

○ SISTEMI DI CONDIZIONAMENTO PER ZONE PERICOLOSE

La società è molto attiva nella realizzazione di sistemi di condizionamento e pressurizzazione di cabine analisi per installazione in aree con pericolo di esplosione (raffinerie, pozzi petroliferi, piattaforme off-shore, ecc.) soddisfacendo le più gravose condizioni ambientali. La nostra ultradecennale esperienza nel campo dell'integrazione di strumentazione ed analizzatori di processo e della realizzazione di cabine analisi ci ha permesso di realizzare dei sistemi HVAC (Heating Ventilation & Air Conditioning) di elevate qualità e prestazioni. La nostra vasta gamma di HVAC ci permette di soddisfare tutte le richieste ed esigenze che ci vengono sottoposte.

La certificazione ATEX di questi sistemi ci ha permesso di essere un punto di riferimento per tutte le maggiori società di Ingegneria e i Main Contractor rendendoci leader mondiali riconosciuti in questo settore.

Process control systems integration

● PROCESS CONTROL SYSTEMS INTEGRATION

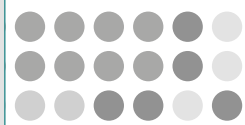

The company is largely involved in the system integration and process engineering for Oil & Gas applications, which includes the design and manufacturing of:

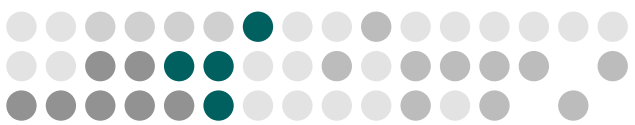

- sample conditioning systems, recovery systems, calibration systems for process analyzers.
- analyzer shelters and cabinets for safe and hazardous areas designed to integrate process analyzers and control automations.
- on-line analyzers' automation systems for continuous monitoring of chemical/physical properties of process and environmental controls.

○ INTEGRAZIONE DI SISTEMI DI CONTROLLO DI PROCESSO

La società è largamente coinvolta nell'integrazione e ingegnerizzazione di processo per applicazioni Oil & Gas che include la progettazione e la realizzazione di:

- *sampling & conditioning systems, recovery systems e calibration systems per analisi di processo.*
- *cabine e armadi analisi, per aree sicure e pericolose realizzate per l'integrazione di analizzatori di processo e automazioni di controllo.*
- *sistemi di automazione per analizzatori industriali per il monitoraggio continuo dei parametri chimico-fisici di un processo di produzione o di controllo ambientale nel settore della raffinazione petrolifera.*

CESI NOTIFICATION

PRODUCT QUALITY ASSURANCE NOTIFICATION

Equipment or Protective System or Component intended for use in potentially explosive atmosphere
Directive 94/9/EC

Notification number: **CESI IFATEX 014 Q**

Equipment or component type: Transportable supply unit
Control and manipulative
Control panel electric incremental
Protection concepts: Flammable enclosure "D"
Pressurization "Y"
Increased safety "C"
Intrinsic safety "I"

Applicant: Autocontrol technologies S.r.l.
Via Sigonella, 18
24066 Pedrengo - BG

Manufacturer: Autocontrol technologies S.r.l.
Via Sigonella, 18
24066 Pedrengo - BG

CESI, notified body n. 0722 in accordance with Article 9 of the Council Directive 94/9/EC of 23 March 1994, notifies to the applicant that the actual manufacturer has a production quality system which complies to Annex VII of the Directive.

This notification is based on audit report n. EX-01006400 issued the 14/03/2015.

This notification can be withdrawn if the manufacturer no longer satisfies the requirements of Annex VII.

Results of periodical re-assessment of the quality system are a part of this notification.

This notification is valid until **14/03/2018** and can be withdrawn if the Manufacturer does not satisfy the product quality assurance re-assessment.

According to Article 10 (1) of the Directive 94/9/EC the CE marking shall be followed by the identification n. 0722 identifying the notified body involved in the production control stage.

This notification may only be reproduced in its entirety and without any change.

Date 18th March 2015 - Translation issued 18th March 2015

Certificate N. IT020471

SGS

The quality management system of
AUTOCONTROL TECHNOLOGIES S.r.l.
Via B. Sigonella, 18 - 24066 PEDRENGO (BG) - Italy
has been assessed and certified as meeting the requirements of
ISO 9001 / UNI EN ISO 9001:2008

For the following activities
Design, manufacturing and servicing of integrated process control systems for the oil, petrochemical and energy sectors.

EA Sector: 18, 18

This certificate is valid from 31/10/2014 until 31/10/2017 and remains valid subject to satisfactory surveillance audits. The certification audit due before 31/10/2015. Issue 7. Certified since 31/10/2008.

Further clarifications regarding the scope of this certificate and the applicability of ISO 9001:2008 requirements may be obtained by consulting the organization.
